

Funding Equity by Grade: Average Per Capita Infrastructure Spending Across State Grades (Grades based on ASCE Report Card for America's Infrastructure)

- Data Source: IJIA Funding Report as of March 2023.
- Average Per Capita Funding: Calculated as total Funding divided by the population.
- Grades: ASCE Infrastructure grades based on state performance.
- Legend: Number of states in each grade classification.

- D states received the highest per capita spending at 1,120.3 USD.
- C states follow closely with an average per capita spending of 1,027.4 USD.
- The majority of states fall into the C and C- grade categories.

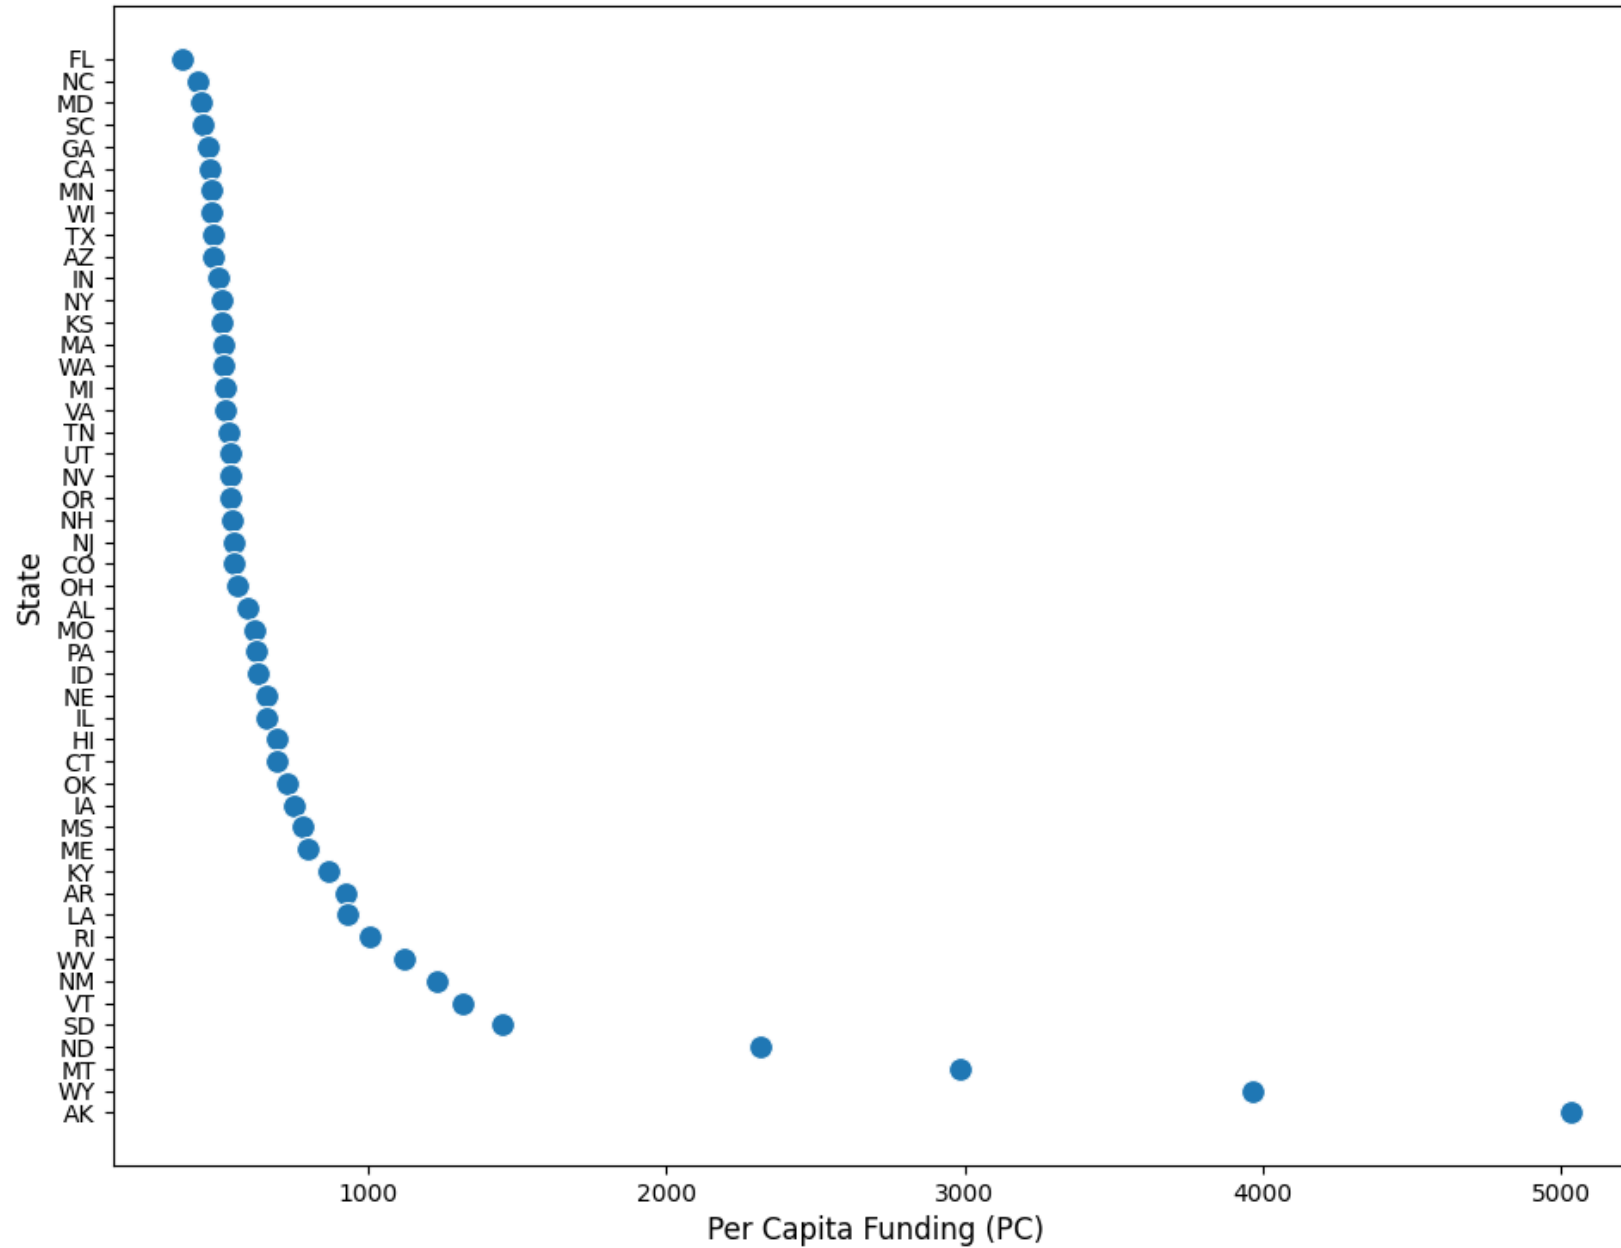

Correlation Between State Population and IJIA Total Funding: Insights and Anomalies

Notes:

- Data Source: IJIA Funding Report as of March 2023.
- Total Funding: Represents the funding allocated to each state, measured in billions of USD.
- Population: Population size for each state, based on the latest available data.
- Points: Each point represents a state.

Per Capita Infrastructure Funding by State

Data Source: IJIA Funding Report as of March 2023.

Per Capita Funding (PC) is calculated as total funding divided by state population.

Note: Several states exhibit significantly higher per capita funding due to smaller populations relative to total funding.

Observation: The distribution shows most states clustered at lower funding levels, with a few notable outliers.
